

COURSE OVERVIEW

Understand supply chains, how they are managed and how to add resilience measures to them. How should you engage with those responsible for procurement and their teams to embed business continuity and resilience into the business supply chain, and ensuring organisational resilience?

Supply chains are often under complex and global pressure, suppliers may be in areas of the world that suffer considerable threats from severe weather systems and many other logistical problems. Learn to communicate across to the procurement team that the resilience measures proposed are an investment in resilience and a value-for-money proposition for the business, through learning their terminology and cost benefit analysis that can influence decisions on awarding contracts to more resilient suppliers to create resilient supply chains.

COURSE OBJECTIVES

At the end of this course, you will be able to :

- ⇒ Be familiar with the workings of supply chain and their component parts
- ⇒ Be able to manage the organization's supply chain resilience
- ⇒ Communicate and work with procurement personnel in awarding more resilient contracts
- ⇒ Create Top Management reports such that the report supports the concepts of building supply chain resilience

COURSE AUDIENCE

- * Business Continuity and resilience professionals who are responsible for their organization's BC programme with a need to understand the importance of Supply Chain Resilience and how to incorporate this into every day practice
- * Those who are interested in supply chain resilience are also encouraged to join this course.
